Ministry for General Machine Construction to draw up and submit lists of all basic materials which are needed by enterprises affiliated with the Ministry but which in the past have either not been available at all in East Germany or have been available in insufficient amounts. The list was also to include

basic material will be required for each enterprise.

2. Dr. Hahn (fnu-no political affiliation) has been entrusted with the task of drawing up the lists of required basic materials for the Main Administration for Radio and Telecommunications Technology (HV RFT). Dr. Hahn is a member of the Central Office RFT (Zentralstelle RFT), which is an office of sorts between the HV RFT and the Work Circles. Hahn draws up the required lists with the assistance of the Work Circles. The amounts of the various basic materials which are needed are to be indicated by the individual enterprises. For this purpose, HV RFT has appointed an unspecified number of technologists to visit the individual enterprises to discuss and set up the lists. By early September 1955, Dr. Hahn had completed the list of chemical materials. Details of this list are contained in [REDACTED]

1. In late August 1955, the East German State Planning Commission ordered the Ministry for General Machine Construction to draw up and submit lists of all basic materials which are needed by enterprises affiliated with the Ministry but which in the past have either not been available at all in East Germany or have been available in insufficient amounts. The list was also to include those materials for which substitute materials have been used without success. The lists of basic materials are also to specify exactly how much of each basic material will be required for each enterprise.
2. Dr. Hahn (no political affiliation) has been entrusted with the task of drawing up the lists of required basic materials for the Main Administration for Radios and Telecommunications Technology (HV RFT). Hahn is a member of the Central Office RFT (Zentralstelle RFT) and is in liaison with the RFT between the HV RFT and the Work Circles. Hahn is to prepare the required lists with the assistance of the Work Circles. The exact amounts of the various basic materials which are needed are to be indicated by the individual enterprises. For this purpose, HV RFT has appointed an unspecified number of technologists to visit the individual enterprises to discuss and set up the lists. By early September 1955, Dr. Hahn had completed the list of chemical materials. Details of this list were not known.
